

Bifolding Double Swing Missing Data

Two swing leaves, each split into folding panels

Focus: panel split, folding hinge representation, and open-state footprint

#	Missing data	Expected answer type	Topic
1	How many panels should each main leaf have?	Exact value	Panel structure
2	How should the fold be split across each leaf?	Exact ratio	Panel structure
3	How should the folding hinge be represented in the preview?	Exact mapping / style	Folding hardware
4	What is the open-state footprint?	Exact value / rule	Motion
5	Should the same Victorian visual style be reused from double swing?	Yes/No	Style reuse
6	Should `widthMm` be read as total opening width or another assembly measure?	Exact definition	Size semantics
7	Should the preview show four moving panels clearly, or keep the folding detail minimal?	Single choice	Visual priority

If an answer is uncertain, mark it provisional instead of guessing. Keep responses short and tied to the exact question number.
