

Single Swing Missing Data

Single-leaf swing geometry for compact access

Focus: single leaf dimensions, hinge side, latch side, and reuse of swing drawing grammar

#	Missing data	Expected answer type	Topic
1	What is the exact leaf width rule for the single swing family?	Exact value / range	Size semantics
2	Is `widthMm` for single swing the leaf only or the full opening including post allowances?	Exact definition	Size semantics
3	What is the default hinge side: left or right?	Single choice	Handing
4	What is the default latch side?	Single choice	Handing
5	Should the single swing reuse the same rail layout as the double swing reference?	Yes/No	Geometry reuse
6	Should the single swing reuse the same pillar / post logic as the double swing reference?	Yes/No	Geometry reuse
7	Should the Victorian decorative set be identical to double swing, or reduced?	Exact mapping / decision	Decoration rules
8	Is `arched_top` allowed on every single swing width, or only on some widths?	Yes/No + condition	Option rules
9	Should the preview show only the gate leaf, or the gate leaf plus a simplified support context?	Yes/No + default	Preview layout

If an answer is uncertain, mark it provisional instead of guessing. Keep responses short and tied to the exact question number.
